Let's Start!

Do you worry about privacy issues on the Internet?

Learning Outcome

Describe necessity, duty, advice, or strong disapproval in written and spoken situations according to work and social contexts.

Ask your partner:

- How often do you change your passwords online?
- How worried are you about having your personal information passed on by websites?

Can Do Statements

- I can talk about technology and personal dilemmas.
- I can say what will have happened or what will have been happening.
- I can express hypothetical situations, wishes and preferences.

Let's Explore!

Sometimes technology is **invasive***!

* When something is "*invasive*", it intrudes and spreads.

Instructions: Read the text aloud.

Imagine if I were to visit Disneyland, where they might make an image of my fingerprint to save me from waiting in line. Novel, right? If only technology were less invasive. Suppose I were to give up identifiable personal information everywhere ... oh, wait, I do. Everyone acts as if this were normal. We pass on information about ourselves as if it were nothing. We offer up credit card and phone numbers, addresses, and zip codes. We tap in preferences, birth dates and answer questions. We post pictures and fill address books online. I'd sooner not have to participate in this, but sometimes I have to.

I would prefer to shop online where credit card numbers aren't stored. I would rather they not be retrievable. However, if they were to start changing storage policies, it's too late for us, the over-documented. I wish I wasn't so paranoid, but I am!

Where will you have been documented by the end of your day? By 9 a.m. the elevator camera in my building will have caught me going out. Electric eyes will have been watching on the street and in the streetcar. If you think they won't have followed me through the station and subway cars as well, you'd be wrong.

By 4 p.m., someone I passed will have been taking pictures. I will have been captured, a nameless but present entity. These photos will have been uploaded to Instagram or Twitter or Facebook where hopefully face recognition software will not have been scouring net images for someone resembling me.

By 9 p.m., how many stores will have been tracking me by data chip when I purchase? How often will I have been asked for information online? That depends on the day.

I long to be less visible. What about you?

Let's Practice!

Peter talks about possible conspiracies.

Instructions: Read the sentences and classify them into the correct category. Practice saying the sentences aloud. Check your pronunciation with your instructor.

1. By 9 p.m. how many stores will have been tracking me by data chip when I purchase?
2. By 9 a.m. the elevator camera in my building will have caught me going out.
3. By 4 p.m., certainly someone I passed will have been taking pictures.
4. Will you have been documented by the end of your day?

Action that will have happened

--

Action that will have been happening

--

Let's Practice!

Giving away personal information can be worrying.

Instructions: Match the halves to complete each sentence. Use the sentences to model a conversation with your partner. Switch roles.

Extension Activity

Watch the film *Identity Thief*.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Go online, to the library or a DVD rental shop and get a copy of *Identity Thief*.
- Watch the film and find out how someone's identity was stolen and how it was used.
- Choose a scene in the film that you like and write a summary of it.
- Outline your favorite scene to a partner or group explaining why you thought it was interesting.
- Finally discuss together whether or not you think this could happen and why.

Target Words

- fingerprint** (noun): the mark left by the pattern of curved lines on the end of a finger
e.g. Imagine I were to visit Disneyland, where they might make an image of my fingerprint.
- to save from** (verb): to spare someone from an unpleasant experience
e.g. They might make an image of my fingerprint to save me from waiting in line.
- novel** (adjective): new and original
e.g. They might make an image of my fingerprint to save me from waiting in line. Novel, right?
- identifiable** (adjective): able to be recognized
e.g. Suppose I were to give up identifiable personal information everywhere.
- retrievable** (adjective): easily recovered
e.g. I would rather they not be retrievable.
- over-documented** (adjective): recorded too often
e.g. However, even if they were to start changing storage policies, it's too late for us, the over-documented.
- nameless** (adjective): name is not publicly known
e.g. I will have been captured, a nameless but present entity.
- face recognition software** (noun): software which can identify a specific individual in a digital image by analyzing and comparing patterns
e.g. Hopefully face recognition software will not have been scouring net images for someone resembling me.
- to scour** (verb): to search very carefully
e.g. Hopefully face recognition software will not have been scouring net images for someone resembling me.
- data chip** (noun): small piece of electronic equipment with information stored on it
e.g. How many stores will have been tracking me by data chip when I purchase?

Self-Assessment

Yes

No

I watch *Identity Thief* in English.

☐ ☐

I choose a scene and write a summary of it.

☐ ☐

I outline my favorite scene explaining why I thought it was interesting.

☐ ☐

I discuss together whether I think this could happen and why with my group.

☐ ☐

Learning Points

Future Perfect: Simple and Continuous

You use the **Future Perfect** tense to talk about an event that will have happened before another one in the future.

Structure:

will have + past participle

Example:

By 9 a.m. the elevator camera in my building will have caught me going out.

With the Future Perfect Continuous, an action in the future is unfinished by the time another action in the future starts. It is most often used with an expression of time.

Structure:

subject + *will have been* + present participle

Example:

By 9 p.m., how many stores will have been tracking me by data chip when I purchase?

Examples:

- *If you think they won't have followed me through the station and subway cars as well, you'd be wrong.*
- *I will have been captured, a nameless but present entity.*
- *How often will I have been asked for information online?*
- *These photos will have been uploaded to Instagram or Twitter or Facebook where hopefully face recognition software will not have been scouring net images for someone resembling me.*
- *Electric eyes will have been watching on the street and in the streetcar.*

Learning Points

Were and the Unreal Conditional

You use *were* and the Unreal Conditional to talk about imaginary situations or events that are unlikely to occur.

You use *were* with the Unreal Conditional to express wishes, regrets or preferences.

You use the Unreal Conditional to talk about a hypothetical or unlikely situation. When you want to be more formal you can use *were* + subject + *to* -infinitive

Example:

Were they to change storage policies, it would still be too late for us.

Other uses of *were* and the Unreal Conditional are to express wishes, regrets or preferences:

- after *wish*

Example:

I wish I weren't so paranoid, but I am.

- after *if only*

Example:

If only technology were less invasive.

- after *would rather/sooner*

Example:

I'd rather the pictures were not retrievable.

Examples:

- *Imagine I were to visit Disneyland, where they might make an image of my fingerprint to save me from waiting in line.*
- *If only technology were less invasive.*
- *Suppose I were to give up identifiable personal information everywhere ... oh, wait, I do.*
- *Everyone acts as if this were normal.*
- *We pass on information about ourselves as if it were nothing.*
