Let's Start!

Are we all part of the global village?

Learning Outcome

Describe detailed facts about events or actions in work and social contexts, in written or spoken situations.

Ask your partner:

- What does the term 'global village' mean to you?
- Do you feel you are part of the 'global village'? Why or why not?

Can Do Statements

- I can talk about technology and personal dilemmas.
- I can express decisions, future events, plans and fixed arrangements.
- I can introduce conditions under which something is true.

Let's Explore!

The term 'global village' was **coined*** by Marshall McLuhan.

* "Coined" means invented by.

Instructions: Read the text aloud.

When you hear the term 'global village', what do you think of? If you look it up, you find it was coined by Marshall McLuhan. Mr. McLuhan was a Canadian philosopher interested in media and how it would affect us. If you delve into his works, you find that his ideas were well ahead of their time. If you consider that his work was published long before the World Wide Web, it is quite astonishing. When you read McLuhan, you hear a voice describing a future we live in today. If you read on, some of his ideas are stated as I understand them. It's the early '60s. Color television is not yet a household item. People still rely on their radios for musical entertainment. Music is recorded on vinyl. Payphones are available on the street if you need to contact someone while you are out. Answering machines are rare. Computers are huge boxes that fill a room and require data to be fed into them on cards. Enter Marshall McLuhan who thinks ...

- The next medium for communication is going to be an extension of consciousness.
- In the new electronic age, we will all become connected - part of a global village.
- Information is going to move to every part of the globe at the same time.
- The computer is going to be a communication and research instrument.
- Advertisements are becoming the most truthful reflection of our society and its activities.
- People are putting more thought into advertising as we move forward than in writing the actual features.

Today, 'global village' describes the Internet. On the web we cross distance in an instant, sending messages in real time. We are more involved globally. We are living proof that Mr. McLuhan's ideas were spot on.

Let's Practice!

The future of communication is now!

Instructions: Circle the correct option to complete the sentences. Read the sentences aloud. Compare yourself to a partner. Correct each other's pronunciation.

1. The next medium for communication **be / will go / is going to** be an extension of consciousness.
2. In the new electronic age, we **will all become / became / becoming** part of a global village.
3. Information **will be / will to / is going to** move to every part of the globe at the same time.
4. The computer is **going to be / is be / going be** a communication and research instrument.
5. Advertisements **will becoming / are going to becoming / are becoming** the most truthful reflection of our society and its activities.

Let's Practice!

Peter loves talking about technology.

Instructions: Choose and write the words from the box to correctly complete the sentences. There are three options that you don't need to use. Read the sentences aloud. Check your pronunciation with your instructor.

Word Bank

spot on / answering machines / ahead of their time / extension / consciousness / vinyl / World Wide Web / payphones / data

1. If you delve into his works, you find that his ideas were well _____.
2. If you consider that his work was published long before the _____, it is quite astonishing.
3. _____ are available on the street if you need to contact someone while you are out.
4. The next medium for communication is going to be an _____ of _____.
5. We are living proof that Mr. McLuhan's ideas were _____.

Extension Activity

Find out more about Marshall McLuhan.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Go online or to the library and look up quotes by Marshall McLuhan.
- Choose 6 quotes.
- Write down the quotes and then express your perception about what each quote means.
- State whether you agree with them or not and why.
- Share the quotes and your ideas with a partner or group.
- Choose which quote you like best.
- Open a short discussion on each one.

Self-Assessment

Yes

No

I find 6 quotes by Marshall McLuhan.

☐
☐

I write what they mean to me.

☐
☐

I state whether I agree with them and why.

☐
☐

I share my quotes.

☐
☐

I open a discussion on them.

Target Words

- term** (noun): a word or phrase used in relation to a particular subject
e.g. When you hear the term 'global village', what do you think of?
- to be ahead of their time** (phrase): having new ideas, opinions, or ways of living long before most other people
e.g. If you delve into his works, you find that his ideas were well ahead of their time.
- World Wide Web** (noun): an information network of text, pictures, and sound that people have access to when they use the Internet
e.g. If you consider that his work was published long before the World Wide Web, it is quite astonishing.
- payphone** (noun): a public telephone operated by putting coins into it or by using a special card
e.g. Payphones are available on the street if you need to contact someone while you are out.
- answering machine** (noun): a device connected to a telephone that answers automatically and records messages
e.g. Answering machines are rare.
- extension** (noun): something added to another thing
e.g. The next medium for communication is going to be an extension of consciousness.
- consciousness** (noun): the state of being awake, aware of what is around you, and able to think
e.g. The next medium for communication is going to be an extension of consciousness.
- reflection** (noun): an image seen in a reflective surface, like a mirror
e.g. Advertisements are becoming the most truthful reflection of our society and its activities.
- spot on** (expression): exactly right
e.g. We are living proof that Mr. McLuhan's ideas were spot on.

Learning Points

Future: Will, Going To, Present Continuous

You use different tenses in the future to express different events or situations.

You use **will** to talk about predictions and immediate decisions.

You use **be going to** to talk about intentions and plans.

Will is known as the predictive future, and describes known facts, or what we suppose is going to be true.

Example:

We will all become connected within the next five years.

Will is also used to express an immediate decision.

Example:

I'll buy the newest phone there is.

Be going to describes intentions or plans. At the moment of speaking the plans have already been made.

Example:

The next medium for communication is going to be an extension of consciousness.

Going to is also used to describe an event whose cause is present or evident.

Example:

Look at how fast new computers are! They're going to become the main communication instrument.

Decisions expressed with *going to* refer to a more distant point in the future.

The **Present Continuous** describes fixed arrangements, especially social and travel arrangements. A time reference is usually included.

Example:

Many people are attending an important lecture by Professor McLuhan this evening.

Examples:

- *In the new electronic age, we will all become connected - part of a global village.*
- *Information is going to move to every part of the globe at the same time.*
- *The computer is going to be a communication and research instrument.*
- *Many people are attending an important lecture by Professor McLuhan this evening.*

Learning Points

Real Conditional: Expressing Truth Conditions

You use the Present Real Conditional to talk about true conditions in the present or in the future.

You use both *If* and *When* in the Present Real Conditional. When you want to talk about true conditions, *If* and *When* have the same meaning.

Example:

If you look it up, you find the term was coined by McLuhan.

When you read McLuhan, you read a voice describing the future we live in today.

Notice the structure of this type of conditional:

If/When ... Simple Present ..., ... Simple Present ...

Examples:

- *If you delve into his works, you find that his ideas were well ahead of their time.*
- *If you consider that his work was published long before the World Wide Web, it is quite astonishing.*
- *If you read on, some of his ideas are stated as I understand them.*
